

EMRG's role is to provide a radio communications system to move information between client destinations. The EMRG Basic Message Form provides a simple form that is intuitive for the client and EMRG members, to facilitate the movement of information.

The Basic Message Form is based on the ICS 213 General Message form, with the signature and reply sections removed.

There are two versions of the EMRG-520 Basic Message Form;

- EMRG-520-2 Two message forms per sheet of paper
- EMRG-520-4 Four message forms per sheet of paper

Print out as many pages of either form as required and cut out the individual message forms on each page.
